User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Team Member
Driver	Car Parking	USN-1	As a parking lot owner, I want to efficiently manage the parking spaces in my lot using AI and computer vision technology.	The AI-enabled car parking system accurately detects and recognizes vehicles entering and exiting the parking lot.	Medium	Nandhini
Driver	Car Parking	USN-2	As a driver, I want to easily find available parking spaces in a crowded parking lot.	The AI-enabled car parking system provides real-time information on the availability of parking spaces.	High	Aishvarya
Driver	Notification	USN-3	As a driver, I want to receive real-time notifications when a parking space becomes available.	The notifications are delivered promptly, with minimal delay, to ensure that drivers receive timely updates.	Low	Mounitha
Driver	Car Parking	USN-4	As a driver, I want to receive alerts if I park in an unauthorized area or violate any parking rules.	The system accurately detects parking space availability, minimizing false notifications and ensuring the notifications are relevant and accurate.	Medium	Sangarapan diyammal

Driver	Car Parking	USN-5	As a parking lot attendant, I want to have a visual representation of the parking lot layout and the occupancy status of each parking space.	The system supports multiple notification channels and allows drivers to select their preferred method of receiving notifications.	High	Nandhini
