

Project Design Phase-II Technology Stack (Architecture & Stack)

Date	06 May 2023
Team ID	NM2023TMID10056
Project Name	AI Enabled Car Parking Using Open CV

Technical Architecture:

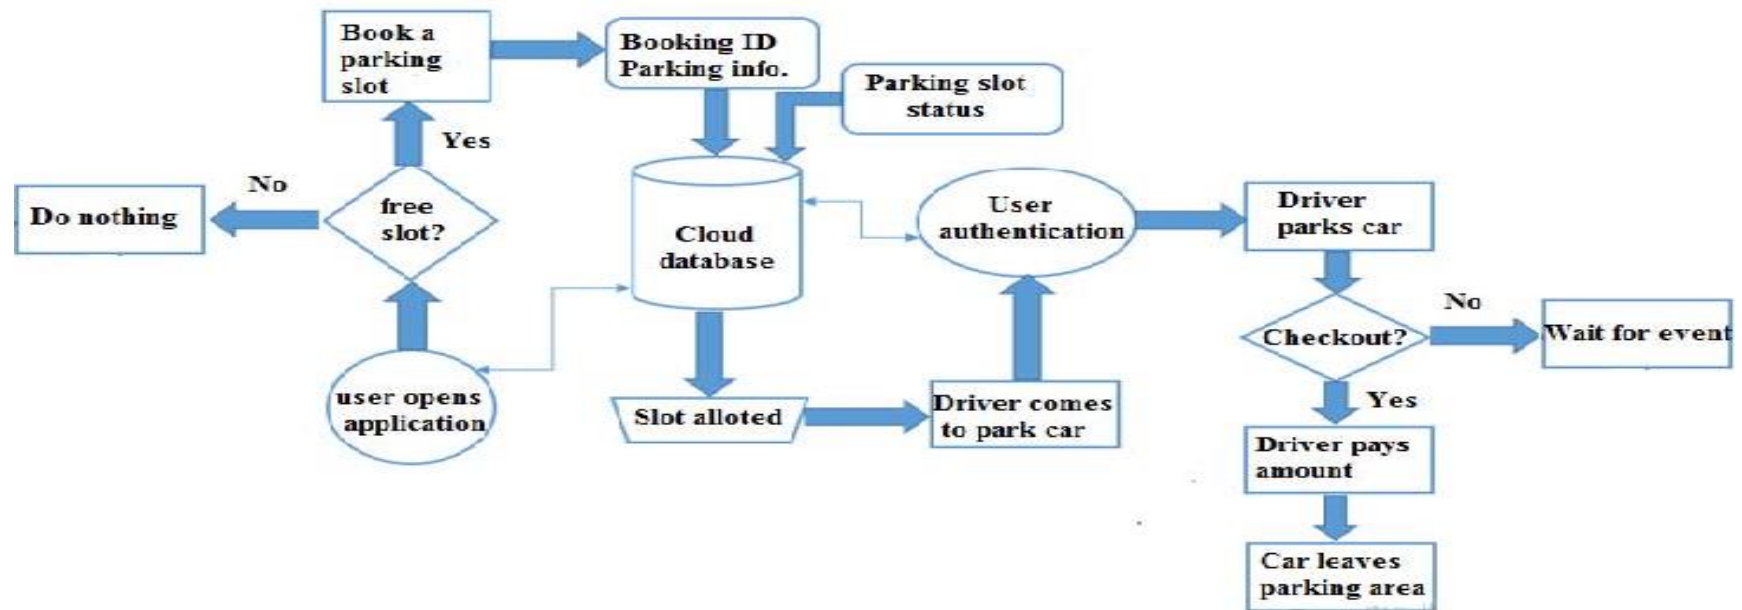

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	Application Logic-1	Logic for a process in the system	Python
2.	Machine Learning Model	Purpose of Machine Learning Model	Object Recognition Model, etc.
3.	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud	Local, Cloud Foundry, Kubernetes, etc.

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	List the open-source frameworks used	Tensor Flow, numpy ,Pandas,Matplotlib, etc.
2.	Security Implementations	List all the security / access controls implemented, use of firewalls etc.	Encryption,SSL/TLS,RBAC,etc.
3.	Scalable Architecture	Justify the scalability of architecture	Technology used
4.	Availability	Justify the availability of application	Technology used
5.	Performance	Design consideration for the performance of the application etc.	Technology used
