Map canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

Using the below empathy map, our users can satisfy their emerging queries and an understanding view about the interface application. Thus the user's can relate their goals along the empathy map.

Brainstorm & Idea prioritisation template :

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 15 minutes to prepare
- 1 hour to collaborate
- 2-3 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

- 1. Team gathering: Define who should participate in the session and send an invite. Share relevant information as you work ahead.
- 2. Set the goal: Think about the problem you'll be focusing on solving in the brainstorming session.
- 3. Learn how to use the facilitation tools: Use the Facilitator's Superpowers to get a heads and productive session.

Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

How might we solve [problem statement]?

Key rules of brainstorming
To get an abstract and productive session:

- 1. Stay on topic.
- 2. Defer judgment.
- 3. Encourage wild ideas.
- 4. Listen to others.
- 5. Go for volume.
- 6. Encourage one-on-one.

Brainstorm

Write down any ideas that come to mind that address your problem statement.

Person 1, Person 2, Person 3, Person 4, Person 5, Person 6, Person 7, Person 8

Need some inspiration?

View a collection of ideas generated by other users in the community.

Group ideas

Take some time to group your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is larger than six sticky notes, try and see if you can break it up into smaller sub-groups.

15 minutes

10

Add a sentence-like label to each cluster to explain a topic or idea. Remove duplicates and merge any overlapping clusters to clarify within your ideas.

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

15

Participants can vote their ideas to place at what they think should go on the grid. The facilitator can coordinate the voting, or have each person place their ideas on the grid.

Importance
A point at which ideas are important and difficult to let go. Only ideas that are difficult to let go should be placed here.

Feasibility
Regardless of their importance, which ideas are easy to implement? Remove those that are not easy to implement.

After you collaborate

You can export the result as an image or pdf to share with members of your company who might find it helpful.

Quick walk-through

- 1. Share the result: Share a link to the final result with stakeholders to keep them in the loop about the outcomes of the session.
- 2. Export the result: Export a copy of the result as a PDF or PNG to share to others, internally or externally.

Keep moving forward

- 1. Strategic alignment: Define the components of a new idea or strategy. Open the template.
- 2. Customer experience journey map: Understand customer needs, touchpoints, and opportunities for an experience. Open the template.
- 3. Strengths, weaknesses, opportunities & threats: Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan. Open the template.
